

Completing the ProSolv® CardioVascular Experience: From Value-Added Services to 24/7 Support

ProSolv® CardioVascular knows that even the most powerful integrated CVIIS needs a strong support system. That's why we offer a number of invaluable services that help keep your network, and all its users, operating at peak performance.

We work hard to ensure that your ProSolv® CardioVascular system is working at full capacity.

Our service professionals are expert at helping you get the most out of your system. Plus, they're available 24 hours a day, 7 days a week, to assist you with any system-related issues that may arise. We also offer:

Value-Added Services.

Our main goal is to help you create a much more efficient workflow throughout your network. And to achieve that, you need a fully integrated system that's configured to your facility's specific needs. Our offerings include:

- **Pre-sales Consulting.** One of our highly-skilled Integrations Specialists will help you assess your overall workflow goals as well as your existing network, interface and/or data migration needs.
- **Customized Reporting.** Our Reporting Engineers' sole mission is to work with your staff to provide comprehensive clinical report customization that meets all your workflow and reporting needs. Services include everything from making minor modifications to report templates and creating custom measurement routines to designing entirely new clinical reports. And to ensure that your needs are accurately and fully met in each completed report, we offer on-site reporting consultations with your clinical staff.

Our Value-Added Services also

include assistance with project management and system implementation as well as personalized training sessions on subjects ranging from clinical use to system administration. All our services are designed so you can take full advantage of every feature ProSolv® CardioVascular system has to offer.

An Extended Maintenance Contract.

Once your one-year warranty agreement expires, ProSolv® gives you the option to continue to take advantage of our service offerings. By extending your maintenance agreement, you'll get all enhancements and newly released software upgrades at no additional cost. You'll have immediate access to our knowledgeable technical support engineers who'll assist you with your ProSolv® CardioVascular network, database and applications. And you'll receive all the support you need for your customized reports.

To discover how ProSolv® CardioVascular's service and support options can help you complete and maintain a seamless integration, contact your ProSolv® CardioVascular Sales Specialist today. Or call 1-800-755-2150.
